**Pelco Showcases Latest Technology Innovations and Strategic  
Application Solutions to Securika/MIPS 2017**

*Advanced VMS and Imaging Solutions for Large Public Venues and Other Strategic Locations*

*ExSite™ Enhanced*

Moscow, Russia (March 7, 2017) – Pelco by Schneider Electric, a global leader in surveillance and security products and technologies, will feature several of the company's advanced security solutions at Securika/MIPS 2017, taking place at the Expocenter Fairgrounds in Moscow on March 21-14, 2017.

Highlighted innovations on display include the powerful open platform VideoXpert™ Video Management Software (VMS) designed to control with confidence, a sneak peek of ExSite™ Enhanced Explosion Proof IP Cameras engineered to survive in the most challenging environments, and Sarix™ Enhanced IP Cameras that deliver the highest levels of low light performance when nothing but the best will do.

“Security operations and procedures have become a core priority for businesses and organizations across every vertical market around the world as security professionals seek the most efficient and effective means to protect people, property and assets. This is especially pertinent for high-traffic public venues such as casinos and arenas,” said Diane Feliciano, VP, Global Marketing, Pelco by Schneider Electric. “At MIPS, attendees will witness firsthand how Pelco video surveillance and security solutions deliver higher levels of situational awareness, protection and even prevention when and where customers need it most.”

In addition to highlighting system solutions with specific benefits for the casino and stadium markets, Pelco’s Securika/MIPS 2017 display features strategic solutions for the oil and gas, city surveillance and hospitality vertical markets, and includes the following highlighted products:

**VideoXpert Video Management Software (VMS)** dramatically improves the control of integrated surveillance and security solutions on a single platform, providing users with greater situational awareness so they can make more timely decisions and execute decisive action. VideoXpert’s open architecture enables third-party applications to be cost-effectively integrated for highly specialized applications in the hospitality, gaming and municipal surveillance markets. Recent enhancements to VideoXpert include: an enhanced user interface for improved centralized system management; incident management to easily and quickly correlate related video files; improved event management to customize event alerts with real-time visual notification; immersive viewing of 180°, 270° and 360° panoramic images from Pelco Optera Multi-Sensor Panoramic Cameras; and much more.

**Sarix Enhanced IP Cameras** utilize Pelco’s exclusive SureVision 3.0 low-light technology making Sarix imaging solutions ideal for hospitality and city surveillance, delivering quality images in as little as 0.05 lux with an incredible Wide Dynamic Range (WDR) of 130dB. Sarix Enhanced cameras are ONVIF Q compliant and are available in

a wide selection of form factors for ease of integration into the hospitality and municipal surveillance markets, as well as many other mainstream applications.

**ExSite Enhanced HD Cameras** are explosion proof and virtually indestructible with performance features that include: a robotically welded housing for use in extreme conditions; a unique patent-pending pan-tilt drive system devoid of belts, gears or pulleys; operation in extreme temperatures; 30X optical zoom with image stabilization; IR illumination; 130dB WDR; 0.03 lux ultra-low light performance; integrated Ethernet, fiber, Ethernet over Coax (EoC) and Unshielded Twisted Pair (UTP) transmission, and more. ExSite is an exceptional imaging solution for oil and gas facilities, chemical plants, manufacturing and marine facilities, and for numerous other demanding environments.
